

ULTIMA VIRTUAL MEDIA

Share your DICOM studies **via the cloud, simply & securely**

Ultima Virtual Media provides your facility with a simple way to present your DICOM studies through a virtual medium (Cloud technology). Perfect for your activity, this simple and secure service contributes to its optimization.

With Ultima Virtual Media, the Cloud is yours...

You select the studies/series you would like to send and then enter the recipient's e-mail address (manually or from a directory). An e-mail is sent automatically, providing the recipient with access to all images in a simple click.

Images are available via the user-friendly viewer (compatible with all PCs, without software installation).

Key Features

- Sends e-mails to multiple recipients
- Enables easy contact management
- Keeps patient information anonymous
- E-mail template (HTML) is fully configurable
- User selects study's specific series
- Fully configurable downloads are provided with an expiration period

Completely Secure

Thanks to the SS protocol and encrypted data (Advanced Encryption Standard 256), Ultima Virtual Media provides optimum security.

The storage space is certified SSAE16/SOC1, SOC2, ISAE 3402.

In the standard version, Ultima Virtual Media enables you to store 10 studies simultaneously in the Cloud – when you send the 11th study, the 1st one is deleted in accordance with the FIFO (First In, First Out) methodology. The possibility of storing a larger number of studies simultaneously in the Cloud is available as an option.
