MED SQUARE
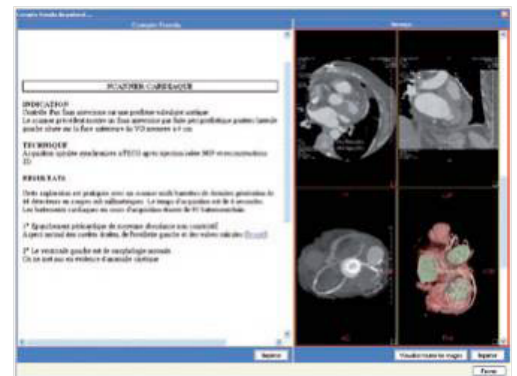

ULTIMA WEB VIEWER & ULTIMA CD VIEWER

At the centre of your images distribution

Ultima Web Viewer   Ultima CD Viewer

These two viewers have the same interface and functionalities, but they differ in their medium of distribution:

· **Ultima Web Viewer** enables you to distribute a complete study (images and reports) inside (intranet) and outside (internet) your facility through **web pages.**
· **Ultima CD Viewer** enables you to distribute a complete study (images and reports) inside (intranet) and outside (internet) your facility through **CD, DVD or Blu-Ray.**

Common key features:

· Multi-modalities viewer: Single frame (CT, MR, CR, etc.) and multi-frame (US, XA, etc.)
· Multilingual interface: English, French, Spanish, Italian, German, Portuguese
· Viewer starts automatically without any installation (work on a secured PC)
· View of the report of the on-going study
· Key object selection and presentation state

So versatile and easy to use:

· Supports images from any modality (CT, MR, XA, US, etc.)
· Multi-monitor support
· Windowing mode pre-set by type of modality and accessible at anytime
· Hanging protocols module for optimal diagnostics
· Viewing window fully customizable (number of series per screen, number of images per series, etc.)
· Full range of measurements and annotations (distance, angle, text, ROI, etc.)
· Simplified creation of boards of images for printing on a Windows printer
· Evolving comparative mode (intra and inter studies) in automatic (based on the positioning of the image in space) or manual (ability to create groups of series)
· Viewing and advanced processing feature: CT/MR automatic reference line and XA (subtraction angiography)
· Multi-planar reconstruction (MPR)
